

Food is defined as any solid, liquid, powder or item intended by the seller primarily for human internal consumption, whether simple, compound or mixed, including foods such as condiments, spices, seasonings, vitamins, bottled water and ice. See 86 Ill. Adm. Code 130.310. (This is a GIL).

October 19, 2000

Dear Mr. Xxxxx:

This letter is in response to your letter dated September 25, 2000. The nature of your letter and the information you have provided require that we respond with a General Information Letter, which is designed to provide general information, is not a statement of Department policy and is not binding on the Department. See 2 Ill. Adm. Code 1200.120(b) and (c), which can be found on the Department's website at <http://www.revenue.state.il.us/legalinformation/regs/part1200>.

In your letter, you have stated and made inquiry as follows:

There is a discrepancy between the amount of sales tax different stores are charging here in CITY for certain items. I am interested in the amount of tax that should be charged on fruit drinks. Some stores are charging 1% others are charging 6 ¼%. The item most commonly in question is Sunny Delight a fortified fruit drink, with an advertised 5% amt. of actual fruit juice.

Could you give me a ruling on this?

Please find enclosed a copy of 86 Ill. Adm. Code 130.310 regarding tax on food, medicine and medical appliances under the Retailers' Occupation Tax Act. As you can see, the regulation provides that food which is to be consumed off the premises where it is sold (other than alcoholic beverages, soft drinks, and food which has been prepared for immediate consumption), and prescription and non-prescription medicines, drugs, and various medical appliances are taxed at the State rate of 1% plus applicable local taxes.

Food is defined as any solid, liquid, powder or item intended by the seller primarily for human internal consumption, whether simple, compound or mixed, including foods such as condiments, spices, seasonings, vitamins, bottled water and ice. See Section 130.310(b)(1). Products that do not meet the appropriate definitions of food, drugs, medicines or medical appliances, or are food prepared by the vendor for immediate consumption, are taxable at the higher State sales tax rate of 6.25% plus applicable local taxes.

Soft drinks are always taxed at the higher rate. Soft drinks include any complete, finished, ready-to-use, non-alcoholic drink, whether carbonated or not, including but not limited to soda water, cola, fruit juice, vegetable juice, carbonated water, and all preparations commonly known as soft drinks of whatever kind or description that are contained in any closed or sealed bottle, can, carton, or

container regardless of size. Soft drinks do not include coffee, tea, non-carbonated water, various milk products, drinks containing 50% or more natural fruit or vegetable juice, powdered drink mixes or concentrated and reconstituted fruit juices. See Section 130.310 (b)(5). Therefore, a fruit drink containing 5% natural fruit juice is a soft drink taxable at the high rate of tax.

I hope this information is helpful. The Department of Revenue maintains a website, which can be accessed at www.revenue.state.il.us. If you have further questions related to the Illinois sales tax laws, please contact the Department's Taxpayer Information Division at (217) 782-3336.

If you are not under audit and you wish to obtain a binding Private Letter Ruling regarding your factual situation, please submit all of the information set out in items 1 through 8 of the enclosed copy of Section 1200.110(b).

Very truly yours,

Melanie A. Jarvis
